

## Formula For Establishing a Handicap taken from the instructions form for the official NFAA Handicap Card

1. An archer's handicap shall be computed on the official NFAA field and/or hunter round, and shall be computed by the following table:

Best score of 2 scores	80% of average differential
2 best scores of 5 scores	80% of average differential
3 best of last 7 scores	80% of average differential

The first and second methods shall be computed only for those archers who have not recorded the minimum of seven scores needed for a full handicap.

2. An archer's handicap shall be derived only from those scores shot within the last twelve (12) month period.

3. All handicaps must be established during a tournament held on official NFAA targets, approved NFAA 2-star Ranges or higher, and where official NFAA field or hunter rounds are shot.

4. The differential is the difference between the actual average and perfect. (Example: Last 7 scores are 430, 440, 415, 460, and 410. The best 3 scores are 440, 450, and 460.

Average= 450.

560-450=110.

80% of 110 equal 88, which is the handicap.

A perfect score in field and hunter rounds is 560.

3 best of last 7 scores	2 best scores of 5 scores	Best score of 2 scores	Handicap
16-30	11-20	6-10	442
31-45	21-30	11-15	438
46-60	31-40	16-20	434
61-75	41-50	21-25	430
76-90	51-60	26-30	426
